Projects & Experience

Full-Stack Developer & UI / UX Designer

Reciplease (reciplease.co)

11/2024 – 12/2024

- Developed a Vue.js web app leveraging generative AI APIs to suggest recipes and grocery pricing.
- Integrated Pinia state management, Firebase Auth, and Firestore for smooth, personalized user experiences.
- Designed and implemented user interfaces using different styling, animation and component frameworks.

Web Developer & UI / UX Designer

Grandeur Service (grandeurservice.com)

09/2024 – 11/2024

- Led meetings with business founders to manage direction and content for the website.
- Developed a responsive static website using vanilla HTML, CSS, and JavaScript – and wrote SEO ready content.
- Created a server-side email forwarding system to send form submissions directly to business owner's inbox.

Full-Stack Developer & UI / UX Designer

The Big Word Game (thebigwordgame.com)

07/2024 – 09/2024

- Developed a real-time educational multiplayer game using Vue.js, HTTP methods, Rest APIs, and WebSockets.
- Created an anonymous, ephemeral username system for competitive party play amongst friends.
- Designed user interfaces and stateful components – and user flows for in-game logic and menu functions.
- Collaborated with a senior developer for code reviews and learning best practices.

Web Developer & UI / UX Designer

Freelance

12/2021 – Present

- Hold in-depth discovery sessions with non-technical stakeholders to devise goals and tactics.
- Create UI / UX designs, design systems, wireframes, components, website copy, etc. as needed.
- Develop static websites using custom code solutions or CMS platforms as requested.
- Manage troubleshooting, domains, hosting, SEO, and content updates monthly for small business clients.
